

PRESS RELEASE

For immediate release

GAS-FREE CAMPERVAN

The Bürstner Papillon PC 6 breaks the traditional motorhome design: this modern campervan does not use any gas. Instead, it offers carefree and safe travelling based on diesel powered forced-air heating – without gas bottles, inspections or open flames.

Vehicle on display at MAT ry's stand, MATKA 6s60

Completely gas-free equipment

Wallas 600D diesel cooker – a Finnish-made stove running on the vehicle's own diesel fuel. The ceramic hob is easy to clean and boils water quickly – 1 litre in 10 minutes.

Diesel heating (Truma Combi 4) – an efficient and energy-saving heating solution that requires no gas.

Smart and compact campervan

Under 6 metres long – easy to drive and park anywhere.

Rear transverse bed with flexible layout, allowing both comfortable sleeping and optimal use of space.

Large fresh-water tank (80 litres) and grey-water tank (90 litres) – suitable even for longer trips.

A safe and worry-free choice

No open flame → better indoor air quality and improved fire safety

No gas bottles → no maintenance or periodic inspections

Suitable for areas where gas use is restricted

Technology and comfort

Citroën Jumper chassis, automatic transmission and electronic stability control

LED lighting, USB-A and USB-C ports, modern cockpit solutions

AGM battery or optional lithium battery, with efficient power management

All this for €59,750 + delivery costs €900

The price includes full equipment from the diesel cooker to heating and comfort features.
